

CAM Update NX Continuous Release (incl. turning)

Objective

This seminar provides information on the innovations to NX in the basic CAM environment.

Content

- General new features
- Hole Making
- 2-axis machining (mill planar)
- 3-axis machining (mill contour)
- 5-axis simultaneous machining (mill multi axis)
- Turning
- Machine Simulation (IS&V)

Additional Requirements

Basics of NC machining technology and experience in working with NX.

Additional informations for the duration

The specified duration is based on an update training including the latest changes of the previous two years.

Update Course

Duration

2 Days

Language

German

Documentation

German

Participants

- Production engineers
- NC programmers
- production planning employees
